## Ring Size Guide

### Find your size with an existing ring

1. Select a ring that properly fits the intended finger and is perfectly round (not misshapen, deformed or oval due to wear).
2. Place the ring over the circles to the right; matching the **inside edge of the ring** to the circle nearest in size. This measurement refers to the inside **diameter** of the ring.
3. If the ring falls between two sizes, you may require a  $\frac{1}{4}$  size ring measurement. Choose the larger of the two sizes and note the  $\frac{1}{4}$  size possibility at checkout. We will follow up with you before processing.

### Alternative option

1. Take a .25-inch strip of paper and wrap it around the base of the intended finger.
2. Tape the paper so that the fit is snug, and then slide the paper ring from your finger.
3. Continue with steps 2 and 3 above.
